

owned and managed by CTI, Inc.

Just Pack It is a fulfillment company delivering for our clients' needs. Our experience and knowledge make it look simple and streamlined. We handle all the necessary factors, putting your mind at ease and thus allowing you to tend to other "fires on your desk."

Managing your fulfillment needs.

Clients tell us that it's less about what we make and more about what we deliver. After all, what good is saving a penny if the delivery date is late or you have to sort through parts?

Just Pack It focuses on value, quality and delivery.

Our passion for top quality fulfillment is surpassed only by our dedication to our clients. Without the strong relationships and communication, our solutions have a difficult time reaching their full potential. In order to help our clients achieve their goals, we make a big deal out of everything.

We make a big deal out of everything.

Take a look at your packaging program and see if there are any problems that have a tendency to arise. If you see them, chances are that others do too. Those problems can cost you more than revenue.

Market share is critical in the business world today and you cannot put a firm price on that.

Gathering parts, assembling packages, packing, coordinating and delivering them on time to the proper locations can sometimes be overwhelming. Logistics is key and to make it run smoothly, we have qualified resources to satisfy your needs.

Fulfillment is the icing on the cake.

Results in fulfillment are measured by quality - not just average - but top of the line results. A seamless and smooth system delivering results makes your job easier and allows you to focus on other matters. Fulfillment comes in many forms and we are equipped to handle demands. With efficiency, accuracy and quality in place, you are assured satisfaction.

Environmental issues are at the forefront of today's news. Creating solutions that are sustainable has been a factor at JPI since the beginning. How much energy was consumed to fulfill and deliver your packaging is something we look at carefully.

What we do today has an effect on tomorrow.

We work to optimize our energy use and utilize the best practices in the industry regarding sustainability. Our mission is to advocate and communicate a positive, robust environmental vision for packaging and to support innovative, functional environmental health through supply chain collaboration.
